PRESS RELEASE

TANZANIA TO PARTAKE FOR MAIDEN TIME IN SA'S MINING INDABA

Dodoma- 22nd January, 2024

The Ministry of Minerals informs the public and mining sector stakeholders that Tanzania, in collaboration with the Tanzania Chamber of Mines, will participate as a country for the first time in the Mining Indaba, a prestigious economic event.

The Mining Indaba conference is one of the largest conferences, bringing together about 900 investors, 40 sectorial institutions, and approximately 1,000 executives from large companies.

The conference, scheduled for February 5th to 8th, 2024 in Cape Town, will serve as an important platform for the participating countries to build and strengthen relationships and business networks in the mining sector.

The event provides a unique opportunity to seek investors, capital, technology, partnerships, trade, share experiences, and learn about the sustainable management and development of Africa's mining industry.

Tanzania will participate with the **theme "Advancing mining investment to accelerate prosperity"**. The theme is consistent with the government's efforts to improve geological understanding of the country by encouraging increased mineral exploration and mining. Currently, the government has launched "**Vision 2030**", which aims to facilitate more geoscientific surveys to uncover the country's mineral potential.

Tanzania will concentrate its efforts at the conference on promoting investment opportunities in the mining sector, including exploration, extraction, and value-added activities.

Furthermore, the government expects to meet with various potential stakeholders from various countries, which is an important development for promoting the country's investment and business opportunities in the mining industry.

For the first time, the government has collaborated with the private sector to facilitate the Mining Sector's participation in the conference.

The Ministry is grateful to our sponsors: Barrick Gold, Anglo Gold Ashanti, Tembo Nickel, Shanta Gold, TRX Gold, Mantra Tanzania, Petra Diamonds, Orica, City Engineering, and AUMS.
